

iBoot IO

Easily toggle a device on or off based on conditions identified by Room Alert.

IBO-IO-REL

We've got facilities covered.

Use the iBoot IO to quickly and easily toggle a device on or off based on conditions identified by Room Alert. Turn a fan on when high heat is detected, or an external sump pump if water is detected. Simply connect the iBoot IO to your Room Alert and the external device using the included power cord. For more information and specifications, please visit AVTECH.com.

RoomAlert™
We've got this.
